

FOR IMMEDIATE RELEASE

Florida Power & Light Wins 2025 AEIC Achievement Award

Company's NERC Information Command Center is recognized for industry-leading innovation

Nov. 6, 2025 — The [Association of Edison Illuminating Companies](#) (AEIC), the electric utility industry's leading authority for operational excellence, announced today that [Florida Power & Light Company](#) (FPL) has received the association's 2025 President's Achievement Award.

The AEIC Achievement Awards are presented annually to member companies that have clearly demonstrated significant contributions to advancing operational excellence in the electric utility industry. The President's Award is the association's highest honor.

The award recognizes FPL for NextEra Energy's NERC Information Command Center (NICC), the industry's first automated real-time continuous monitoring compliance system designed to meet an expanding set of regulatory standards governed by the North American Electric Reliability Corporation (NERC). Co-developed by FPL and its parent company, NextEra Energy, the NICC embodies a comprehensive compliance intelligence platform supported by a dedicated enterprise data warehouse powered by automation, AI and analytics, and smart controls—both preventative and detective. The NICC recognizes that compliance is not a static set of obligations but a dynamic, living function that requires intelligence, integration, and intentional design.

“The NICC is more than a technological innovation—it represents a shift in mindset,” said Bob Wargo, FPL senior director of the NERC Compliance Center of Excellence. “By operationalizing compliance and embedding it into the very fabric of how work is performed, the NICC ensures that FPL and NextEra Energy are not only compliant but are also continuously demonstrating it, efficiently and transparently.”

Beyond regulatory compliance, the NICC adds substantial business value. By enabling real-time compliance oversight, the NICC allows for targeted cost tracking, long-term cost savings, and strategic capital investment. This strategic alignment allows FPL and NextEra Energy to meet its regulatory obligations while maintaining cost discipline and improving resilience.

“The energy industry is at an inflection point. As threats evolve and compliance expectations rise, utilities must think differently about how they deliver assurance,” said Steve Hauser, CEO, AEIC. “The FPL and NextEra Energy NICC offers a blueprint for innovating with purpose, integrating with rigor, and leading with resilience — setting the industry standard.”

FPL was presented with the award on Friday, November 6th at AEIC's 141st Annual Meeting in Charleston, SC. To see a full list of 2025 AEIC Achievement Award recipients, visit <https://aeic.org/achievement-awards/>.

About AEIC

AEIC brings together the electric utility industry's leading operations experts to rise to challenges, accelerate opportunities, and achieve excellence in all aspects of generation, transmission, distribution, and storage of electric power for the benefit of its members, the industry at large, and consumers, worldwide.

Founded by Thomas Edison and his associates in 1885, AEIC is the electric utility industry's longest-serving and preeminent association. Today, AEIC's members work closely together to share knowledge and provide guidance to the industry essential to achieving a modernized grid that delivers a secure energy future for all. To learn more about AEIC, its technical committees, and member companies, visit <https://aeic.org/>.

About Florida Power & Light Company

As America's largest electric utility, Florida Power & Light Company serves more customers and sells more power than any other utility, providing clean, affordable, reliable electricity to more than 6 million accounts, or approximately 12 million people. FPL operates one of the most fuel efficient and cleanest power generation fleets in the U.S and in 2022 won the ReliabilityOne® National Reliability Award for the seventh time in the last ten years. The company was also recognized by Escalent in 2022 as one of the most trusted U.S. electric utilities for the ninth consecutive year. FPL is a subsidiary of Juno Beach, Florida-based NextEra Energy, Inc. (NYSE: NEE), a clean energy company widely recognized for its efforts in sustainability, corporate responsibility, ethics and compliance, and diversity. NextEra Energy is also the parent company of NextEra Energy Resources, LLC, which, together with its affiliated entities, is the world's largest generator of renewable energy from the wind and sun and a world leader in battery storage.
